What's New in Abila Human Resources Version 2014?

HUMAN RESOURCES ENHANCEMENTS

- The Check for Updates menu item in Help is no longer available. Future updates to the HR product will be made available via Abila Auto Update.

- Timesheet Approver is now an option in the Employee info query

- Users will now see a Required checkbox if an HR Process is set as required in the HR Processes setup.

- A Process Log is now created when Regular/Supplemental Timesheets are loaded in HR. This will allow users to see who and when timesheets were loaded.

- Audit records are created when HR processes are assigned to employees.

- When job codes are assigned to employees the exempt and OT eligible defaults flow through to the employee record.

- Mass updates can now be made to EWS Employee Web Settings. Mass update options include: Default Cost Center, Default Earnings Code, Default OT Earnings Code, Cost Center for OT, Default DT Earnings Code, Default Leave Cost Center, Default Earnings Code for Leave, Timesheet Approver

- Double Time is now included as a part of the Earn|Def map in the timesheet import process.

- Employee Certifications that are expired are now grey so you can tell which ones are expired which ones are active.

- The Report Writer now has a default data set for HR processes

- The Web Timesheet by Cost Center Report now has a grand total on the report.

HUMAN RESOURCES BUG FIXES

- The Web Timesheet report now filters based on employee Type, Salaried or Hourly.
